Jacksonville, FL; 5th January, 2009—Sight & Sound Productions has been chosen to manage the Internet and networking systems for the Wyndham Riverwalk's Convention Center.

Sight & Sound Productions has an established relationship with the Wyndham Riverwalk, having continuously been its in-house audiovisual company since 1997. After recently expanding into the event technology field, this new assignment is an opportunity for Sight & Sound Productions to further upgrade and streamline the Wyndham's existing data services. The wireless Internet and networking needs of the Wyndham's convention guests will be met and maintained by Sight & Sound Productions' Director of IT & Hotel Operations, John Gornto and his team.

“With all audiovisual and event technology needs being handled by one company, Sight & Sound Productions, the Wyndham's convention guests can enjoy more seamless planning and integration of their event needs, as well as more immediate technical support and customer service,” Gornto says, explaining the benefits of the new system.

Sight & Sound Productions is a full service event production company that endeavors to find new ways to meet the evolving demands of the event production industry. The company prides itself on the technologically advanced meeting facilities of its in-house venues, and continues to improve and adapt these facilities to meet the needs of its clients.
