Jacksonville, FL; 15th March, 2009—Sight & Sound Production introduces the newest addition to its event services with the GreenScreen Event Photography Package.

This innovative idea is a creative way to commemorate an event for its guests and give them something to take home at the same time. The package features a green or blue screen, a professional camera and photographer, and digital printer. Clients can choose a digital background that corresponds with the theme of their event, includes a company logo, or features a landscape or other scenery. Guests then pose in front of the green screen, and after a few clicks on an accompanying laptop, the photo prints out with their image superimposed onto the pre-selected background. The creative options are limitless, and guests are sure to delight in a souvenir of their experience.

Sight & Sound Productions has invested itself in providing new, interesting packages for its clients to complement and enhance their events. For more information on the event production company and its various services, explore their website at <http://www.ssav.net>.
