Jacksonville, FL; 20<sup>th</sup> May, 2009—Sight & Sound Productions is proud to join the ranks of production companies in Northeast Florida that have successfully executed a show in a foreign country.

Sight & Sound Productions provided audio equipment and technicians for Miles Productions for a week on the island of Nassau, Bahamas early this year. This was the first international show for the production company. It proved to be a learning experience, as international customs and immigration played a significant role in the logistics of planning the event. Sight & Sound Productions exported over 1,000 pounds of audio equipment to the Bahamas, and had two technicians on-site at the event, which featured several worldwide conference calls. Sight & Sound Productions worked closely with the island venue to coordinate the conference calls and to ensure that the audio equipment was set up and managed to meet the client's goals for the week-long conference.

Sight & Sound Productions has produced events all over the continental United States. This particular event marks a major achievement for the company in their quest to expand the geographic range of events they produce.
