Jacksonville, FL; 2nd June, 2009—Sight & Sound Productions has been awarded a bid to provide full concert audio equipment and support for AT&T's Greater Jacksonville Kingfish Tournament & Festival. The event is the largest kingfish tournament in the United States, and draws thousands of people each year.

Taking place July 20th-25th, 2009 at the Sisters Creek Park, the kingfish tournament also includes live music, a food festival, a boat show, and exhibitors. Sight & Sound Production is contracted to provide their new XLC line array system for the concert portions, as well as support equipment and staffing for the event. This will be the largest concert Sight & Sound Productions will have utilized its new line array for.

The XLC line array is at the top of its class in concert audio, with a streamlined design and more powerful sound. Since acquiring the system, Sight & Sound Productions has become more involved in the concert and festival audio niche. For more information on Sight & Sound Productions and their audiovisual technology, visit www.ssav.net.
