November 30th, 2009; Jacksonville, FL—Sight & Sound Productions, Jacksonville's leading event production company, has recently completed the purchase of all local audiovisual assets from Communicate Media Technologies, a multimedia presentation company which was located in the Sawgrass Marriott. This marks the third time this year that Sight & Sound Productions has purchased the inventory from another local event production company, adding substantially to its own in-house hotel inventory and event production resources.

This acquisition has significantly increased the quantity of equipment in several departments at Sight & Sound Productions. The hotel in-house inventory has been enhanced with 10 additional LCD monitors; the IT department has grown significantly with the addition of several new laptops and desktops, color printers and high-speed copiers, and fax machines. Most importantly, Sight & Sound has added several, high-end video switchers, and extra-bright DLP and LCD projectors to its video production department, and acquired an additional 75 lighting instruments for the lighting department, and increased the inventory of intelligent moving lights to over 50 units. These additions have made Sight & Sound Productions' video, lighting, audio and hotel in-house inventory the largest Northeast Florida and Southeast Georgia by a large margin, resulting in the company's increased ability to offer quality equipment to its clients, and produce more shows simultaneously.

Sight & Sound Productions has again proven its ability to stay relevant in a down economy, purchasing new and top-of-the-line audiovisual equipment in order to keep delivering the highest quality event production services in Jacksonville. For more information on Sight & Sound Productions and their work, including photos and other news, visit their website at www.ssav.net.
